

Information for Staff Caring for Patients post Faecal Transplantation

Re: _____

Named consultant:

This patient has had FMT via the Colonoscopy/flexible sigmoidoscopy ~~today~~ at today at the Endoscopy Unit. Procedure was ~~conducted by~~ conducted by:

Print Name: Signature:

Designation: Date *dd/mm/yyyy*:

Procedure was well tolerated. Yes No If no, action taken

Instructions:

- Continue to monitor observations as normal.
- Continue to give meals as normal
- Continue with prescribed medications as normal
- Record bowel motions accurately on the stool chart

Patient must pass at least one bowel motion before discharge. Note that the first few motions will be watery because of the faecal microbiota suspension infused into the gastro-intestinal tract.

Any concerns please call the named consultant's team who will contact the FMT multi-disciplinary team or on call gastroenterology ~~team~~ if team if required.
