

Day Procedure Unit

Not Passed Urine?

After your operation you may not want to pass urine before you are ready to leave the day procedure unit. The large majority of people in these circumstances pass urine quite normally in due course.

Should you experience any discomfort or distension, with a feeling of wanting to empty your bladder but being unable to do so, we suggest that you:

- Gently walk around
- Run the bath / sink taps so you can hear the running water while trying to pass urine

If you are still unable to pass urine

- **Contact the Day Procedure Unit on 01603 286008 or 01603 287660 between 7am and 8pm Monday to Saturday.**
- **Outside of these hours or if you become uncomfortable whilst waiting for a response please contact the doctor's number listed in your discharge letter or your GP .**
